

2008 New product

## Non-Stick baking sheet

- Sheets designed for frying  
Highly resistant material  
Maximum Non-Stick characteristics

### Double sided T2

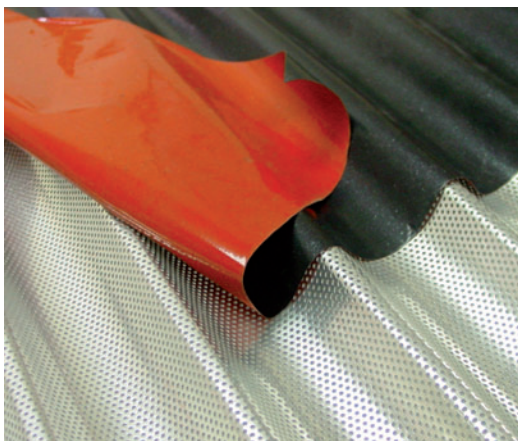

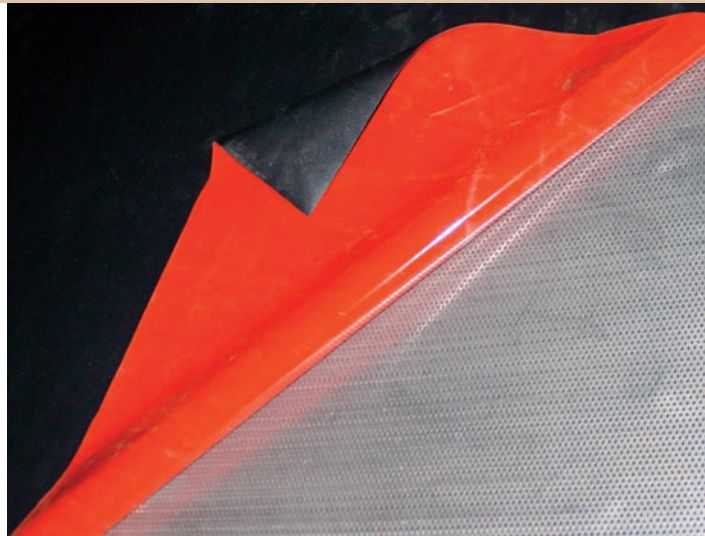

- red = silicone tretead surface
- black = perfectly non-stick

The red surface lets the sheet be placed on a tray or stainless steel work bench surface, where it will "grip". The black surface, perfectly non-stick, will make working easy, on a sheet which stays in place.

#### Uses :

- working with sugar, caramel,shaping chocolate.
- for freezing or baking (-40°C +250°C)

Very easy to clean

#### Sheets available :

- Cut to any size
  - Per roll (width of 600mm) of 5,10, or 15m
- Easy tu cut

This product may be used as an alternative to coating or re-coating.
